William Desmond Taylor, one of Hollywood's most famous directors, got shot and killed on February 1st, 1922. Could things get stranger in Los Angeles? A cop in Los Angeles called Ernie Carter, wakes up from a big blow to his head and gets sent back in time and into William's body. Ernie read about Williams's sudden death and is waiting until the moment he would be shot and killed. What will happen to Ernie when the murder of William gets closer to happening? Will Ernie get out of his body in time?

This book was filled with lots of mystery and lots of drama, at every part of this book I was always itching to know what would happen next! I was wondering at every part of the book if he would make it out of Williams's body, or if he would get shot and killed just like Will. The vocabulary in this book is very easy to understand and the pace is pretty fast.

*The Man Who Died Twice* is recommended to anyone who loves a great mystery book, and I would rate it four out of five stars! If you want to find out if Ernie will make it out of Williams's body in time, read this adventurous book!
